

## 安全性测试——SQL 注入

本网站通过添加 JavaScript 表单验证，检测特殊字符的输入，用户名和密码只能是字母和数字的组合，以防止 SQL 注入攻击。

测试用例 1:

用户名: zhujie36

密码: ' or 1=1 --

The screenshot shows a login form titled '登录' (Login). The '用户名:' (Username) field contains 'zhujie36' and has a green '输入正确' (Input correct) message next to it. The '密码:' (Password) field contains a masked password '.....' and has a red error message '密码必须是字母数字的组合' (Password must be a combination of letters and numbers) next to it. At the bottom, there are buttons for '注册' (Register) and '登录' (Login).

测试用例 2:

用户名: wangxin12'-- (wangxin12 用户已保存在数据库中)

密码: 1qaz2wsx (错误的密码)

测试结果:

The screenshot shows the same login form. The '用户名:' (Username) field contains 'wangxin12'--' and has a red error message '用户名只能是字母或者数字的组合' (Username can only be a combination of letters or numbers) next to it. The '密码:' (Password) field contains a masked password '.....' and has a green '输入正确' (Input correct) message next to it. At the bottom, there are buttons for '注册' (Register) and '登录' (Login).

结论: 本网站可以阻挡一定的 SQL 注入攻击。
